

Project name : LiPLANET

Li-ion cell pilot line network

Project description

A network of Battery experts

LiPLANET's overall objective is to create a European innovation and production ecosystem. The plan is to build a more competitive Lithium battery cell manufacturing ecosystem and increase the production of Lithium cells towards industrial scale, by bringing together the most relevant European Lithium battery cell pilot lines and the main stakeholders of the battery sector.

Role of ABEE:

- ABEE will play a leading role in the definition of the Data Management Plan and the implementation of the data exchange platform.
- ABEE will also be responsible of standardising the legal framework for collaborations with and within the network.
- Finally, as an engineering company with its own pilot line, the company will participate in the round robin test related to production of Li-ion batteries.
